

OnDemandTesting™

Providing a cost-effective solution for short-term QA needs

Smart Staff Augmentation | Team Extension | Pay-Per-Use

Finally, there is a better way. QA Consultants OnDemandTesting service is a practical, cost-effective and low-risk approach for organizations to secure better testing performance.

Since 1994, our QA professionals have set the standard for value, quality, scalability, flexibility and project delivery across a variety of industries, including banking, insurance, retail, government, manufacturing and internet services.

The secret behind OnDemandTesting is “Smart Staff Augmentation.” QA Consultants keeps a bench of full-time talent with the right skill sets employed and ready to be deployed. This kind of operational flexibility allows clients to have access to a pool of resources when needed and save on costs when projects slow down, saving time and money.

Services include:

Smart Staff Augmentation

Access to North America’s largest pool of expert testers with the widest range of application and industry experience to satisfy any project or business need

QA Consultants team members are vetted by our clients to ensure cultural fit, delivery of quality and professionalism

Ongoing training programs ensure resources stay current on technical and industry developments as well as important soft skills

OnDemandTesting™

Top notch talent when needed, for as long as needed, and pay only per use

Access to the same bench of vetted resources previously engaged to avoid learning curves, increase comfort levels, and allow rapid ramp-up

All engagements include a lead, allowing for communication, on-boarding, and business transaction ease

QUALITY ASSURED WHEN NEEDED

What you need, when you need it

SCOPE	APPROACH	DELIVERABLES
<p>Supplement your team or provide an entire team</p> <p>All testing types and models available</p>	<p>Understand your requirements</p> <p>Provide a proven team with relevant experience</p> <p>Agree on a pricing method that fits your business</p>	<p>Provided via JIRA/ALM</p> <p>Test assets include scenarios, stories, test cases and defects</p> <p>Quick turn-around</p>

QA Consultants can help reduce cost, meet production deadlines and improve quality by offering a resource solution that combines the quality and risk aversion of system integrators at the speed and cost of IT staffing firms.
